Pre-Sales Solution Architect | Dynamics 365, Power Platform, Copilot & AI

Experienced Pre-Sales Solution Architect specializing in Dynamics 365, the Power Platform, Copilot, and AI. Proven track record of leading discovery, solution design, demonstrations, estimates, proposals, and statements of work for clients across manufacturing, legal, real estate, oil and gas, and financial services. Combines executive-facing communication with hands-on technical expertise to shape scalable, business-focused solutions that drive measurable value.

EXPERIENCE

Velosio

Pre-Sales Engineer – AI & Power Platform

Remote

Mar 2026-Present

- Partner with prospects, clients, sales teams, and practice leadership to envision, design, and validate low-code solutions that drive meaningful business outcomes
- Translate business challenges into scalable, secure, and feasible solutions built on Microsoft Power Platform, with a focus on AI, Copilot, Power Apps, and Power Automate
- Lead discovery conversations to understand business processes, pain points, and future-state goals
- Build and deliver solution demonstrations that clearly communicate business value and process improvement opportunities
- Develop estimates, proposals, and statements of work aligned to customer goals and delivery expectations

TrellisPoint

Pre-Sales Solution Architect

Remote

Jun 2025-Mar 2026

- Engaged directly with prospects and customers to understand business requirements, pain points, and strategic objectives
- Delivered solution demonstrations and presentations across Dynamics 365 Customer Engagement applications, including Sales, Customer Service, Customer Insights, Field Service, and Project Operations, as well as the broader Power Platform
- Led pre-sales workshops, proof-of-concept sessions, and technical discovery engagements
- Collaborated with sales and solution architecture teams to develop proposals, RFP responses, and statements of work
- Translated business requirements into solution designs and articulated the business value and ROI of proposed solutions

MCA Connect

Pre-Sales Solution Architect for Power Platform & Customer Engagement

Remote

Jan 2021-Apr 2025

- Supported \$20M in Microsoft Dynamics application sales and consistently contributed \$5M to \$7M in annual sales
- Designed, configured, and delivered technical demonstrations and proof-of-concepts showcasing Dynamics 365 Copilot, Sales, Customer Service, Field Service, Project Operations, Customer Insights, Power Apps, and Power BI
- Led discovery sessions and delivered up to 10 demonstrations per month across prospective and existing clients
- Spoke at the AI Agent & Copilot Summit in San Diego on the opportunities, impact, and outcomes of using agents and copilots in M365 Modern Work
- Developed project scope, solution designs, estimates, timelines, proposals, statements of work, and resource plans, and presented recommendations directly to clients
- Supported RFP responses and contributed to the development and long-term planning of proprietary applications and accelerators

NTT Data Corporation

Dynamics 365 Techno-Functional Solution Architect

Remote

Mar 2020-Jan 2021

Client: Office of the Attorney General of Florida

- Served as design lead on a \$22M Dynamics Sales and Case Management implementation supporting more than 1,400 users
- Led a team of 20+ developers and coordinated development efforts across workstreams
- Led live product demonstrations, story-tailoring sessions, and design workshops
- Assigned development tasks and ensured alignment between solution design and business requirements
- Developed a significant portion of the implementation while collaborating with 50+ client business units and senior stakeholders
- Gathered and translated requirements across 140+ applications to align current-state and future-state business processes with project objectives

Hutton Inc.*Techno functional Analyst/ Project Manager***Chattanooga, TN***Dec 2016-Mar 2020*
